

Announcing a Better Way to Manage Your Communications.

Dialing is about to become a thing of the past. Now there's a better way to make calls, receive calls and handle your messages. It's called SpeechPhone and it's changing the way we communicate.

1 First, you can stop handing out business cards with three or more phone numbers. Why make it difficult for people trying to track you down? With SpeechPhone, there's **only one number** your contacts need to know. And you control where it rings – at home, at the office, on the road – your callers can always find you!

2 Then there's Mandi. Your SpeechPhone account comes with **your very own virtual assistant**. She answers your SpeechPhone number and routes your calls. She also takes messages, reads your e-mail to you, makes calls, replies to voice mail, and much more. Just think how much more productive you'll be.

3 And it's driven by **the power of your voice**. Through intuitive voice commands you can tell Mandi what you'd like to do, and she'll get it done.

Best of all, SpeechPhone works with any phone. There's no new hardware or software to buy! You just sign up for the service online and in five minutes, you can use it from anywhere!

So why wait? Change your communications today. Contact your authorized SpeechPhone agent.

Take a look at some of the ways SpeechPhone can make you more productive.

Hands free dialing. Keep your hands on the wheel and your eyes on the road. Just say who you want to call and Mandi will dial for you.

One place for all your messages. Pick up your voice mail and e-mail at once, by phone or through the Web.

Away from your computer? No problem. You can still send and listen to e-mail over the phone. Now you never have to miss an important e-mail.

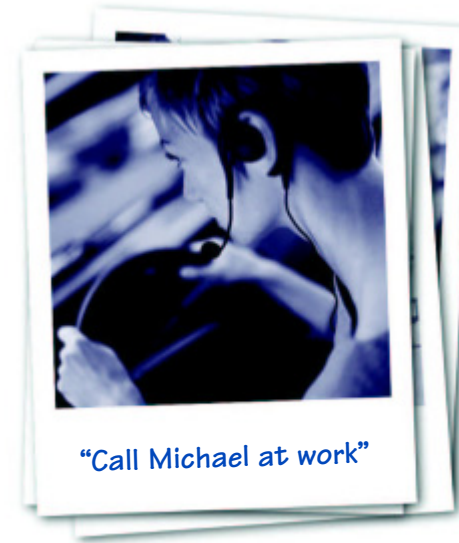

Want some peace and quiet? Tell Mandi to hold your calls – you can check your messages later.

An address book you can never lose! With a virtual address book it's as close as the nearest phone. Call or e-mail your contacts or just ask Mandi to read you their phone numbers.

Respond to messages quickly. No more scrambling to jot down a number any time someone leaves you a message. Two simple words – “call back” – will save you the time and hassle.

Be reached but never bothered. Mandi can find you wherever you tell her to look – at the office, at home, at a hotel, at a client's office. You say where your SpeechPhone number rings. And Mandi can help you screen your calls too; she'll tell you who's calling so you can decide which calls to take.

Easy message forwarding. When an e-mail or voice mail can be better handled by someone else, just forward the message. You can even send the messages to groups and they don't have to be SpeechPhone subscribers.

Your new communications lifestyle—more **productive**, more **reachable**, more **in control**. With SpeechPhone, communications are never going to be the same. **What are you waiting for?**

Please contact your authorized SpeechPhone agent.

Are you still dialing?

What would you like to do?

The traffic was terrible, and I was going to be late for my big presentation. But with the press of just one button, I got Mandi and told her who to call.

Crisis averted.

It was one of those crazy days...three client meetings in three different cities. Fortunately I was able to check all my messages - voice mail and e-mail - between meetings with one single call to Mandi!

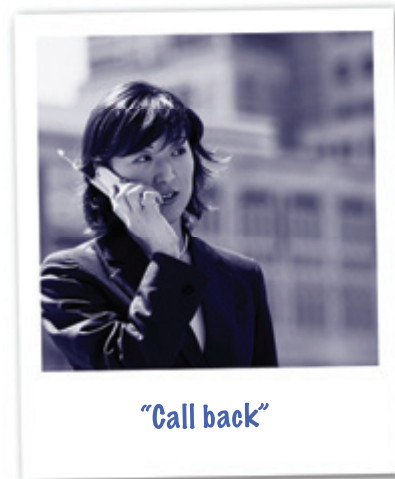

We won the deal! I was so grateful to the whole team. I called Mandi, recorded a "thank you" message and had it sent by e-mail to everyone involved.

I needed some quiet time to finish my report. So I told Mandi to take messages for me until I got it done.

At lunch I really impressed the client. He wanted names and phone numbers of three reference accounts. I called Mandi. She read me the phone numbers from my address book and within seconds the client had the information he wanted!

What a time saver! On the way back to the office I picked up an urgent message. I was able to return the call right away just by saying "call back." Thanks to Mandi, I didn't even need to pull out a pen and paper to write down the number.

My son wasn't feeling well so I decided to bring my work home. Good thing I had Mandi route my calls to the house; this afternoon I closed the Clayton deal from my living room.

Five people left me messages this morning in response to our new web promotion. As I was in meetings all day, I forwarded them to my business partner so she could respond quickly.
